Videos are best visual representation of the subject matter, which helps in better understanding of the topic taught. The video can be used by the teacher during the classroom for complex topic matters. For example, while teaching the Reproduction System in plants, a video can show graphically/flowcharts the steps involved in the reproduction system in plants. In general, videos can be related to the topic in any manner that aids in better understanding and at the same time makes the classroom teaching a fun activity for the children.

For a particular topic, a video link can be provided in various forms such as:

- (a) YouTube Video Link
- (b) Offline Attached Video
- (c) Any other online Source Video Link (such as: khan academy, etc.)

Please use the following template for sending videos:

Name of Video:	
<u>Medium:</u>	Offline/Online (Provide link in case of online; otherwise specify as offline attachment)
<u>Source:</u>	
<u>Content:</u>	What areas/content related to the topic is covered in the video ?
<u>Duration:</u>	
<u>Author:</u>	
<u>Is Copyright protected?</u>	
<u>Language:</u>
