

How to Set up meeting in Jitsi

Visit : <https://desktop.jitsi.org/Main/Download.html>

Download the exe and install

Step 1:

Click on the “Microsoft Windows Installers (32-bit version).” If you know that you have **64-bit Windows** you can click on the “64-bit version” instead.

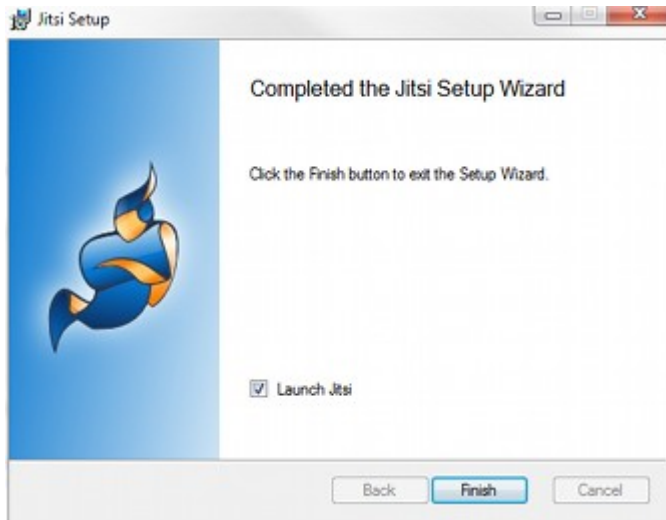

Step 2:

Start the process by clicking “Run”

Step 3:

The installation takes a few minutes, but eventually it lets you know that it completed the installation. Click “Finish”

Step 4:

Jitsi will launch automatically. But to open it in the future, double click on the Jitsi shortcut on the desktop

Step 5:

Jitsi lets you log into several chat accounts at once. Fill out the username and password for the accounts you already have. If you don't have any accounts with the providers listed, create a new account by clicking on one of the "Not registered yet" links. After filling in the username and and passwords for the accounts you want to use, click "Sign in."

Sign In

Configure all your favorite protocols in one click.
